Wedding and pregnancy during the COVID-19 pandemic

Caelin Fillingim

Name for posting: Caelin Fillingim

Major and Expected Graduation Date: VCD March 2022

Your experience during COVID-19:

My life has changed drastically since the pandemic started. The pandemic started when I was 18. I had done running start but this was my first year being away at college. My fiance and I had been planning a wedding for July 20, 2020, due to Covid restrictions we canceled it. We decided to just get married and skip the wedding all together due to the uncertainty of when the pandemic would end. We ended up getting married June 6th, 2020 with just the officiant and two required witnesses present. In November of 2020 we got the surprising news that I was pregnant. We had not been planning on having a baby for several more years. Navigating pregnancy during a pandemic was very interesting, for example I had to take my birthing class virtually and when it came time to have the baby I wasn't allowed visitors in the hospital.
