Raider Nader Speaks Here

Ralph Nader, lawyer and outspoken critic of auto-safety legislation, will speak in Showalter Hall on Tuesday May 4, at 8 p.m.

Nader has been instrumental in bringing about many of the changes in the automobile industry including safer cars and reduced highway deaths. He has worked on legal, political, and legislative issues, both legislative and judicial, of highway safety and automobile design and has served as a consultant and contributor to many legal publications.

With the recognition that we have had to do with the potential and economic capability to build safer cars for decades, he has worked to reduce highway death. He has carried his principles into the athletic department and the college's Joint Statement on the basic human rights of the athlete and at the same time the coach will not infringe on the basic human rights of the athlete and at the same time the coach will not infringe on the basic human rights of the athlete and at the same time.
Since Ralph Nader will be speaking here next Sunday, I have decided to offer some observations concerning the role of the press in reporting government affairs.

...In addition, the press has been regrettably lax in fulfilling its role as the 'gadfly' and watchdog of government, needs to be filled on the state and even college level. It is a role The Easterner has tried to fulfill in its weekly coverage of student and administrative affairs.

As the closest observer of campus activities and student government, this newspaper has tried to present events fairly and accurately, and when necessary, to comment and interpret those events.

Since many of Eastern's students are commuters and therefore not aware of the inner workings of campus matters, it is essential they be represented in this watchdog capacity.

The year is not over and The Easterner fully intends to continue its role as an observer, reporter, interpreter, and, when necessary, 'gadfly' of the campus scene.

A SMILE HELPS

Why is it that students on campus should expect the same courteous, friendly service that they receive in any other business in downtown Cheney or Spokane?

You can smile everywhere on campus. The cash register attendant in the Student Union Building will take your dime as soon as she is through talking to a friend; the post office personnel will see you a stamp as soon as they finish a hand of nonchalant, the book store clerk will wait on you after she's placed all the books on the shelf; the gal at the information desk will cheerfully accept maps whenever you back a plain Hershey and ask for an Almond Hershey instead.

These are not remote examples but every day occurrences. If a customer received such neglect in any ordinary business establishment the daily reception would be instant.

The school personnel are state employees who are far removed from the watchful eye of the state bureaucracy. The attitude of some, not most, is one of annoyance toward the inconsiderate student who is in a hurry to get to class and is trying to rush the attendant who is chatting with a friend on the phone.

When a store downtown treats a customer in this manner, the purchaser will usually go elsewhere, never to return. The customer on campus puts up, begrudgingly, with the obstinance he receives because the service is worth the pains, but barely.

Then it takes one with "a tough hide" to continuously smile and be pleasant to droves and droves of people standing in lines for an hour's minute hunk of nickle to spend. But it is the job of these people to take that nickle pleasantly. They are aware of this when they take the job.

A smile is not a job requirement, but courtesy is.

Social discord has brought with it an undesirable companion: violence. If this violence conflicts with the basic premises claimed by dissenters: Friday's Law Day observance here will probably be ignored, if not scorned, by those advocates of a free society.

But how can one who claims to want freedom for the oppressed advocate with the same breath violation of the laws which attempt to provide that very freedom.

Granted, not all laws are just. But neither are all laws oppressive. One cannot be selective about the laws he will obey, since disrespect for any one law inevitably leads to disrespect for all.

Today's dissenters might do well to look back into history and follow the lead set by an ancient Greek philosopher in 399 B.C.

Unjustly convicted of corrupting the youth of Athens, and because he would not compromise his principles, Socrates was sentenced to death by a jury of 500 Athenians, his peers.

Friends arranged for his escape, but Socrates refused, saying, "in leaving the prison...do I not desert the principles...acknowledged to be just?"

Rather than violate the laws he had advocated. this brave citizen, Socrates was willing to die.

"Now I depart in innocence, a sufferer and not a dier of evil; a victim, not of the laws, but of men." Those of our society who would improve rather than destroy it will follow the example of Socrates, one of history's greatest rebels, and join the observance of Law Day.

---

Letters to the Editor

Anti-Smoking?

Editor: It sure makes a guy feel good to live in a world where justice prevails.

You know that in this great system there is something as obvious as the poor and just as liable for punishment. Why, just the other day I read that rich and famous Tony Curtis was fined $210 for transporting drugs across international boarders.

Surely the fine doesn't slow down his anti-smoking campaign! Bill Banner

Board 'Foolish'?

Editor: The establishment of a publications board is necessary. The Easterner is, at best, a foolish personal entirely suitable for the job.

Letting the "students of Eastern and specially the A.S. Council" assume authority over the publication will likely result in three things: 1) emphasis of traditional school functions and activities with corresponding de-emphasis of non-school material, 2) purging of any political activities (meaning those terrible leftists) from positions of responsibility and 3) general regression of The Easterner to the level of a high school punk sheet.

You can simply not allow non-journalism majors to dictate a newspaper's content. (I take that back; you can allow such a newspaper to dictate but the results will be that college's apparent 'authoritative' view of the written word as in English literature but, alas, will be applicable to past and present cases in history, politics and now in being used in athletics.

That is to say that when an individual utillizes symbolism to give specific meaning to indicate his particular point of view at a particular time; then an individual may be "plagerize" that "original symbolic use" seems to depreciate the intent or purpose behind the original use of that act. The "clenched fist" act had a specific connotation attached to it because the symbolic act was originated by a number of world champion athletes at a world renowned athletic event — namely, the summer Olympic games in Mexico city.

This combination of athletics and Olympic games gave that demonstration an impact that would be very difficult to duplicate again. The impact of this demonstration had on the viewing audiences of the world was tremendous and as indicated by the controversy raised in most newspapers and periodicals in North America.

I am suggesting that this action, the raising of the "clenched fist", by those specific people, (black athletes just crossed world record barrier) and in the setting of an Olympic arena gave that type of protest demonstration an impact and effect. Therefore, at least in my opinion, any attempt to duplicate this "symbolic act" by second — or third (maybe even fourth) class athletes at or during a small college athletic event, truly

(Continued on Page 13)
Boy, if the bed race Wednesday afternoon is anything like the motorcycle race last Sunday it’ll be the biggest thing since throwing Christians to the lions.

Almost all the riders let their marks in the ground, some of them did a 200 and keep, but the end-of-the-day award goes to Mike Lane, senior, for his bit in the first lap of the first race.

Mike did manage a weak grim and a "V" sing from the ambulance window when he also earned him the True Grit award. He should be on his feet again in about four months.

All this for Collegiate Week? You bet. the Greeks say they’re pulling out the stops and if the weather cooperate they’ll have good things happening all week.

As I mentioned above, the bed race is scheduled for today and the drivers are all going to have to pull some stuff to beat the extremes of the motorcrossers. If you can’t back the violence though, your best bet for today is the Nitecorp in the SUB.

Thursday evening, a really great dance band, The Gentlemen Agreement will play for a short concert preceding the dance at nine in Ball.

Friday is the big one. The Cowills in concert in the Fieldhouse. We hope it will be the biggest and best show of the year so don’t miss it.

P.S. Mad Hatters, contact 822 Second Ave. N. Apt. 10 Seattle 98109

Record Review

**Rock-A-Billy Album Good**

By John M. Johnson

Besides being a fascinating historical document, "The Great Buddy Holly" (Vocation 73811) remains thoroughly invigorating rock-n-roll. Here we have 10 on a in the mornings, with the various departments will jointly conduct a one-week workshop at Coyote University workshop. Professors from Ross, Dr. Earl Stewart, Dr. Alfred Robert Keyser, and the participating groups.

It will also be important, said Ross, to see the different socio-cultural student with an opportunity to students and families, and to re-evaluate attitudes and beliefs concerning traditional and non-traditional Indian culture. It will be also important, said Ross, to provide the different socio-economic levels, cultural differences, and cultural systems in the various Indian communities.

The workshop will be held June 6 to 13 in Spokane and will earn three resident credits. The tuition fee is $22 per credit hour, or $26 for the week.

The workshop will be conducted on a very informal basis, said Ross. Discussion groups will meet in the mornings, with the afternoons free. The evening entertainment will include films on culture conflict. Participants will also be able to learn authentic Indian dances, horseback ride, fish, and swim. Special events, as a finish to the workshop, St. Mary’s Mission, will also highlight the week.

More than 25 courses in creative arts are being offered by Eastern for high school students in the annual two-week High School Creative Arts Summer Series June 14-24.

"Students from the ninth through 12th grades can attend courses of their choice taught by outstanding college professors and visiting specialists," said Dr. Harold K. Stevens, acting director of the Creative Arts Division.

Donald Thompson, musical director of the Spokane Symphony Orchestra, will direct the summer series orchestra and work with players of stringed instruments, Dr. Stevens said.

Students can also enjoy classes from specialists in art, dance, drama, gymnastics, radio-television and speech.

Film Due

"The Good Soldier Schweik" will be presented today at 3:45 and 7:30 in Kennedy Auditorium, said Sue Wallace, librarian.

This Czech film, a satire on war, concerns the misadventures of a fumbling, bumbling character who, when the war breaks out, lands in the Army’s psychiatric ward where he is subjected to a hilarious set of tests and becomes a "certified idiot."

Art classes include drawing, printmaking, watercolor and experimental media; creative dance classes will explore techniques of movement and dance composition; theater performance and acting projects will be offered in drama; gymnastics classes will develop performance skills; radio-television announcing and television production classes will be offered; and classes in public speaking, debate and oral interpretation will be available.

Musical activities include the orchestra, band, choir, piano, voice, jazz workshop, theory, conducting and literature of music, Dr. Stevens said.

Registration for the series must be completed by June 9. Classes will begin June 14.

‘A Gift of Love’ is AWS Theme for Moms Day

‘A Gift of Love’ will be the theme of the Associated Women Students’ Mother-Daughter Day Saturday at Tawanka Commons.

AWS President Carol Drewnel said the day’s program begins at 9 a.m. when the girls pick up corsages at Chet’s Flowers at Tawanka Commons.

Pictures will be taken at Tawanka Commons’ radio of Spokane from 10 to 11 a.m. A cocktail hour will be held from 11 to 11:30 a.m. at Tawanka. The house mothers and Dean of Women Zabel will be present to meet the mothers.

At 11:30 a.m. a luncheon will be given at Tawanka with entertainment by Eastern’s folk singing group “The Simple Folk” and by Paulette Miller, also from Eastern. There will also play several piano selections.

A fashion show will be held at 2:30 p.m. in Kennedy Library Auditorium with fashion by the Associated Student store Bob Marche.

All the girls’ dorms will have open house all day, said Miss Drewnel.

New Use for SUB Debated

Walter W. Isle Memorial Union Building SUB will close doors next winter quarter after 20 years of serving students as the center for campus activities.

What will be done with the old building has already been decided yet although some requests have already been put forth. Campus Planning Committee, the administrative body that will make the final recommendations to the Board of Trustees.

Part of the building has already been claimed, Bali Lounge will become additional floor space for the bookstore, and the radio-television and journalism departments will continue to occupy the second floor.

But the entire SUB building will be vacant when Pence Union Building opens at the beginning of winter quarter 1971.

The Student Union Board of Control, the sub-committee of the Associated Student Council, has drawn up a proposal that will keep the building, if accepted, from being torn down.

“Because the new union building is being built for a student population already reached before construction began, the SUBOC feels students have the greater need for the building space,” according to the proposal.

When expansion of the bookstore into Bali Lounge is completed this summer, students will no longer have a place for movies, dances, lectures or other main student functions.

According to the proposal, the Harbor and Games Room will take over this function. With the south wall removed (a relatively simple and inexpensive procedure, according to Walt Zabel, director of student activities), the area will be approximately two and two-thirds the size of Bali.

Upstairs, the journalism department, specifically The Easterner and Kinknlick, will be expanded.

The Kinnickinick will take over the Easterner office, doubling it in present work area. The yearbook photographers, was was a complete use of the existing darkroom, now shared by the two publications and the journalism photography classes.

The Easterner, according to the proposal, will move to A.S., a new darkroom built in the storage area across the hall in the Tahiti room.

ROBIN TURLEY, student well known for his singing abilities, performed Monday night to a packed and appreciative crowd in Bali Lounge. Donations were asked for at the door to help the children of Lakeland Village raise funds for the Special Olympics.

Tahiti and the Faculty Lounge would become office space for student organizations such as the Black Student Union, Off-Campus Cheney and Spokane and others.

Although other requests have already been put before Campus Planning Committee, the administrative body that will make the final recommendations to the Board of Trustees.

Prof Plans EW Law Day Observance

D. Roger Reed, state assistant attorney general in Spokane, is scheduled to address Eastern’s Earth Day activities as a民间 advocate for the liberal community, having served as Spokane County deputy prosecutor prior to his appointment as assistant attorney general.

Reed is a 1967 graduate of the University of Washington School of Law.

His present duties include consumer protection as well as providing legal counsel for most of eastern Washington’s state supported college and junior colleges.

The Law Day program is being sponsored by Dr. Joseph Schuster, assistant professor of political science, and a number of pre-law sensors.
Job Market Slows

Boeing layoffs and levy problems are two of the reasons for a slower job market this year, said Raimond Giles, director of the Placement office.

Although the Boeing layoffs have considerably affected the teacher employment market, Giles expects the more agrarian oriented eastern part of the state to be less bothered by the layoffs.

"The majority of our people usually stay on the eastern side of the state," said Giles. "If we can keep this trend, Eastern should not be hurt too badly by the lagging market."

Some school districts have had levy problems, said Giles, but most of these have passed or are expected to pass the second time around.

I believe we are going to have a reasonably good year, our situation is not nearly as bad as many parts of the country," said Giles.

Some teaching areas such as elementary music and physical education, industrial arts, library and special education are shortage areas regardless of the slowdown, said Giles.

Other areas such as secondary social studies including psychology and history, and philosophy education are always slow movers and people in those areas may have difficulty in finding jobs.

SWEA Drops Merger Plan

A proposal for a merger here of the National Education Association and American Federation of Teachers has been dropped indefinitely due to lack of member interest and disagreements between Washington Education Association and AFT representatives.

SWEA President Robert Stange announced last week.

The NEA-AFT merger has been a controversial issue for both organizations in recent months. The major issues separating the two groups are gradually being overcome but only a handful of professional groups throughout the nation have accepted the merger.

The Eastern chapter's proposal would have been the first student merger in the nation.

The merging of the two largest professional teachers' organizations is expected by many to become a reality in the near future. Two main organizational issues dividing the two are becoming "dead horse issues" according to Myron Lieberman in a recent issue of Phi Delta Kappan, an educational journal.

Lieberman is a professor of education at Rhode Island College and author of numerous books and articles on teachers' organizations. He is generally considered a leading authority on collective negotiation movements in education.

The issues, according to Lieberman, are AFT's affiliation with AFL-CIO an affiliation they seem to talk and reduced in exchange for the support of the larger NEA and NEA's inclusion of school administrators at negotiations.

Only a few NEA state groups, Washington included, still permit administrators to participate but this aspect is often either ignored or is causing too many difficulties to remain acceptable.

The merger, if it comes, is expected to have direct effects on teacher militancy, although exactly what the effect will be will vary with the situation each group is involved in on state or local levels.

The merger would be expected to lessen the need for militancy by strengthening teacher organizations in other channels of negotiation but at the same time it could strengthen the effectiveness of direct action measures.

Arts and science graduates were not having many problems securing jobs until the Boeing situation and subsequent limitations in state employment said Forrest Amaden, arts and science placement officer.

Accounting majors will have no trouble being placed said Amaden.

"Computer science, merchandising, marketing and finance people should do well also."

There is definitely a "softening of the job market," said Amaden. "The big employers either didn't come or only interviewed once this year."

Those persons with the liberal arts majors will generally find it tougher to get a job said Amaden. "In my experience I have found that these majors get fewer offers."

"The biggest complaint from employers is that students do not know what they want and many do not support their goals," said Amaden.

Last year average salaries for beginning teachers in Washington were $6,336, Giles said. "I am sure Washington salaries are up more than these figures show," he added, "since many of our people were on the basis of last year's salary schedule before new ones were adopted by school districts, with the understanding that they would receive any raise in the salary schedule."

Salaries ranged from $6,460 for primary teachers to $10,300 for students placed in community colleges.

Average salaries for arts and science graduates, unlike those in education, are higher for men than for women, Amaden said. Among last year's placements, men averaged $7,352, up $454 over last year, while women averaged $5,398 down 85.

Arts and science graduates placed in 1969 by Eastern had average starting salaries of $459 per year more than education graduates placed in teaching positions by the college.

Supply Rooms Broken Into

Approximately $22 worth of merchandise was taken from Duplilating and Stores located in the basement of Showalter Auditorium last Thursday evening, according toDupilicating and Services Supervisor, Mrs. Connie Lloyd.

The robbers method of entrance into Showalter is unknown. However, Mrs. Lloyd said that locks on the doors to supply rooms in duplicating were broken.

Items taken included pens, pencils, tablets of paper and cotch tape. "These are all untraceable items," said Mrs. Lloyd.

She said that precautions have been taken to eliminate the problem.

Wilderness To Be Studied

A unique opportunity to study and work in the wilderness is being offered by Eastern and the American Camping Association May 9-10 at Camp Wooten, 20 miles east of Dayton, Washington.

This is the first time anything like this has been offered in the Inland Empire," said Theron Tibbits, director of the department of recreation and park administration.

Based on the theme "bridging the gap between students and administrators," the program is designed to bring students, administrators and interested lay persons together to discuss some of the trends and problems in the area of camping and outdoor recreation, Tibbits said.

More than 100 persons are expected to attend," he said, "and invitations have been sent to colleges, universities and camp administrators throughout Washington, Oregon and Idaho, as well as to all members of the Inland Empire district of the ACA.

Registration will begin at 11 a.m., May 9, with the first session on camp skills and crafts to begin at 1:30 p.m. Evening discussion groups will focus on such topics as camping for the retarded, modern trends in camping, program planning and safety and sanitary administration and will climax Saturday's activities.

Highlighting the May 10 session will be a speech by Sandy Murray, chairman of the Evergreen section of ACA, who will discuss "The Role of the American Camping Association."

Interested persons can contact the department of recreation and park administration, Tibbits said.
Campus Activities Spotlighted

Program Will Help Stutterers
An intensive five-week program for stutterers will be offered this summer by the department of speech-speech correction, said Dr. Dervan Breitenfeldt, department chairman.

"The program will provide clinical experience for graduate students in speech correction while offering group and individual therapy sessions for two and a half hours each day," Dr. Breitenfeldt said.

A diagnostic evaluation is required before the program begins, and all interested persons are urged to make arrangements with the clinic immediately.

The session starts July 1 and is open to persons 15 years and older. Housing arrangements on campus can be arranged and only a minimal fee will be required for the therapy, Dr. Breitenfeldt said.

Meeting Open
Three student candidates from the Political Science Club are seeking two voting positions on the faculty council of the Political Science Department and will present their positions and views during a coffee hour in Monroe Lounge tomorrow.

Frank Delaney, Jim Sundberg and Bob Doell will speak between ten and 12 tomorrow morning. In addition to presenting their views they are expected to stress the balloting for the positions which will take place from May 1 to May 11. Anyone desiring to attend is invited.

Requirements Discussed
There will be a meeting tonight at 7 p.m. to discuss general college requirements as pertaining to physical education, said Donald K allem, Chairman of the HPE Curriculum Committee.

Attending the meeting will be Dr. Henry-York Steiner, Dean of Undergraduate Affairs and the faculty of the physical education department.

All students interested in this meeting are invited to attend, said K allem.

Workshop In Summer Plans
"Development of Secondary Bookkeeping Projects" is the topic of a four-day workshop being offered here this summer.

Open to both beginning and experienced teachers, the workshop is designed to develop projects that may be used to emphasize basic concepts of bookkeeping, said Dr. Kermit G. Palmer, associate professor of business education.

"We will bring in experts on the use of textbooks in bookkeeping and will seek to help teachers make the subject more meaningful to the students," Dr. Palmer said.

ATTENTION SENIORS

It's that time of year again—time to select the TOP TEN SENIORS. In order to be considered by the Committee, a senior must be nominated by himself or another senior with at least 151 credit hours.

Please help us choose these outstanding students by filling out the nomination form below. In order for your nominations to be considered, you must indicate the number of credit hours completed. Your name and a list of your activities and/or honors that you have had since you started at Eastern would be appreciated, and kept completely confidential, but that is optional. Beside the name blank is a space to give the reasons for nominating each person so that the committee can have some information on which to base its judgments.

Criteria to be used by the committee in their selection of the TOP TEN SENIORS is:

A. Any senior with 151 or more credit hours completed, and who is currently enrolled at the time of nomination, or who has graduated.
B. Activities and contributions to the school and the students (need not be in A. S. Government).
C. Leadership ability.
D. Over-all personality, sincerity, and general attitude towards his fellow students.
E. CGPA of 2.00.

Tear off the bottom of this page, fill it out, and send to: Sue Mercer, c/o SUB Box 1194, Campus by Friday, May 8, 1970.

The Top Ten Seniors committee would appreciate your help in selecting the Top Ten Seniors by filling out the following information and mailing it to: Sue Mercer, c/o SUB Box 1194, Campus by Friday, May 8, 1970.

Fee Payment To Be Deferred

Pre-registration without payment of fees will be possible for Eastern students for the first time this spring.

Dean of Students Daryl Hagie said students will be allowed to pre-register now, deferring payment until September 10. Hagie said payment may be made at any time during the summer as long as it is done prior to the September deadline.

Failure to pay before this date will result in cancellation of registration, although the student may still go through Fieldhouse registration.

The only penalty for this would be the loss of the class cards obtained during pre-registration. Payment of fees may still be made at the time of registration.

The new procedure came consideration, Dean Hagie said, when a student appeared before the Board of Trustees and pointed to the difficulty some students have of raising $320 at the end of the school year.

An additional benefit to the procedure will be the reduced load on the cashier. Rather than processing long lines of students during pre-registration, all that will be necessary will be the opening of envelopes as they come in.

To Be Deferred for Eastern students for the first time this spring.

The purposed of the experiment is to increase understanding of chemical bonding forces. This particular type of interaction is not well understood at present," said Dr. Long.

Dr. Long has been teaching at Eastern since 1982. During that year he received a research grant from the American Chemical Society Petroleum Fund to study interactions of nitrogen and oxygen. He spent last year on sabbatical leave, at Canterbury University, New Zealand, studying and doing research on metal complexes.

Dr. Long's experiment will entail isolating a helium atom, which has two electrons, in a vacuum and then shooting free electrons from an electron beam into the vacuum to collide with the electrons in the helium atom. The collision will cause the helium electron to jump up into another energy level.

One it differs," said Dr. Long.

Dr. Long has been teaching at Eastern for three years and has worked on several other grants, but never had one especially delegated to him.

Students will also help Dr. Douglas and Dr. Long on their experiments. Both plan on working all summer. Without the burden of teaching they will have more time to spend on their experiments.

Profs Get Grants

Two faculty members from Eastern's Division of Science were given research grants last month from The Research Corporation in New York. Dr. John Douglas, chemistry, was given $5,000 and Dr. Daniel Long, physics, was given $4,000.

Dr. Douglas will be investigating the interaction between phosphine atoms and certain other acceptor molecules. When a phosphine atom is formed there remains an unshared pair of electrons. Dr. Douglas will be combining different groups with phosphine atoms to better understand how the different groups effect the behavior of the electrons and to measure the stability of the phosphine and the acceptor molecule.

Dr. Douglas has been carrying on this experiment to certain degrees since 1987. "The significance of this experiment is that it will increase the understanding of chemical bonding forces. This particular type of interaction is not well understood at present," said Dr. Douglas.

Dr. Douglas, a chemistry professor has been teaching at Eastern since 1982. During that year he received a research grant from the American Chemical Society Petroleum Fund to study interactions of nitrogen and oxygen. He spent last year on sabbatical leave, at Canterbury University, New Zealand, studying and doing research on metal complexes.

Dr. Long's experiment will entail isolating a helium atom, which has two electrons, in a vacuum and then shooting free electrons from an electron beam into the vacuum to collide with the electrons in the helium atom. The collision will cause the helium electron to jump up into another energy level.

"One it differs," said Dr. Long.

Dr. Long has been teaching at Eastern for three years and has worked on several other grants, but never had one especially delegated to him.

Students will also help Dr. Douglas and Dr. Long on their experiments. Both plan on working all summer. Without the burden of teaching they will have more time to spend on their experiments.

Kiln Put to Work After Two Years

Ceramics classes may be expanded next quarter since the art department for the first time has been able to use a gas kiln installed two years ago in the basement of Hargraves Hall.

"We were just recently able to get the ventilation system changed so we could use the kiln," said Assistant Professor William Sage, ceramics instructor.

The kiln, whose outer appearance resembles that of a 1,000-square foot refrigerator and acts as an oven, allows students to become familiar with reduction firing in the glazing process of ceramics. This process burns on the shiny finished surface of ceramic products.

"The gas kiln creates a reduction atmosphere whereby the student can control the amount of heat," Sage said.

In the past, the ceramics department has been using three electric kilns. The largest one is 6 cubic feet, which can only produce an oxidation atmosphere - a condition under which students cannot control the fire. According to Sage the reduction firing will produce a more deep lustrous glaze especially since it gives metallic colorants deeper and more natural shades of color.

"In an oxidation atmosphere a copper based glaze will turn green whereas in the reduction atmosphere it will turn red," he said. Sage added that to some people this "fire-and-flame" aspect of reduction firing creates a romantic idea besides achieving a "more natural product."

"The gas kiln, which is 16 cubic feet, allows a larger number of ceramic art pieces to be glazed thus allowing a possible enlargement in class enrollment." said the assistant professor. He also said the new kiln will only be used by students in advanced ceramics classes.

For Mother's Day

Cycles Crash In Motocross

Two Eastern students were injured in the first annual Motocross motorcycle race last Sunday. Mike Lane, R-TV major, sustained a broken ankle and Roger Harris received head cuts when four or five bikes collided on the first lap of the 250 cc event. There are varying opinions on what happened, but apparently Harris, who was leading the pack, lost control of his bike and was hit by several racers close behind, including Lane. Both were taken to the Student Health Center. Lane was transferred to Deaconess Hospital in Spokane for surgery on his leg. Harris was treated for cuts and bruises and released. The event, sponsored by Eastern's Interfraternity Council, was won by Tom Moore in the 100 cc class and Kenneth DeSave, who took the 250 cc event. Brian Snipes and Rudy Bets tied for second in the 506 class.

The race, which is part of the IFC-Panhellenic Special Olympics, is scheduled to be run again next year. According to Joe Reed, a member of Eastern's Interfraternity Council, the 100 cc class and Kenneth DeSave, who took the 250 cc event. Brian Snipes and Rudy Bets tied for second in the 506 class.

The race, which is part of the IFC-Panhellenic Special Olympics, is scheduled to be run again next year. According to Joe Reed, a member of Eastern's Interfraternity Council, the 100 cc class and Kenneth DeSave, who took the 250 cc event. Brian Snipes and Rudy Bets tied for second in the 506 class.

The track had been well planned with hills and jumps that required a skilled cyclist with, perhaps, more courage than sense.

The 100 cc race went off without a hitch with Tom Moore topping his class. It was the first lap of the big 250 cc race that ended in the serious accident. Several accounts of what happened have been heard, but no one knows for sure. As I saw it, a cluster of bikes were approaching the steep up-hill grade, when one bike, apparently operated by Roger Harris, the leader of the pack, went out of control. The four or five other bikes close behind, were unable to stop or avoid Harris, and he and his cycle were hit from behind. One of those bikes was operated by Mike Lane. It appears that Lane's bike hit Harris's and he caught his foot, breaking it above the ankle.

Lane sustained a severe break which has since required surgery and will certainly need a long period of convalescence. Harris, who appeared to be the most seriously injured, was treated for cuts and bruises and released. He suffered a respiratory difficulty, and thanks to a nurse on the scene, received artificial resuscitation and was revived.

Lane demonstrated remarkable courage. His lack of panic caused spectators to regard his injury more lightly than it actually was. The pain must have been terrific (see picture on page 1), yet he kept his "cool" as his concerned room mate Bill Banger applied a splint to his leg. In spite of his injury he joked with friends and made light of his predicament.

Such an accident, unfortunate as it was, could happen on the street, highway or anywhere. To blame and criticize the race organizers is unfair. They did a commendable job of sponsoring the affair and did take safety precautions. An ambulance, nurse, sheriff and strategically located flagmen were on hand.

The excitement of any race is based on its aspects of risk. Every racer entered the race knowing there might be danger involved. Each participant signed a statement accepting full responsibility. The number of motorcycle enthusiasts is immense. They accept the risk whether driving down the highway or in a competitive event. A broken bone is not going to deter cyclists from seeking their sporty thrills.

Eastern's Savages head north this Saturday for the Vancouver Relays Track and Field Event at Vancouver, B.C.

Despite another weekend of wind, hail, and snow, the Savages destroyed Whitworth Pirates, 96-61, last Saturday at Woodward Stadium.

Savages won 13 firsts and five seconds against the Pirates. Kari Morrison, Tom Wood and Curt Hisaw took three in the javelin and Ed Fisher. Mike Greenwood and Mark Wah finished second in the long jump.

The other sweeps came in the running events. Syd Muzzy, Arnie Moore and Gene Reese added nine points for the Savages in sweeping the 440 intermediate hurdles.

In the 880, Ian Sorens and Mike Johnson finished in a dead heat, just one second ahead of teammate Ken Crawford.

Dave Powledge continued his winning ways in the shot put with a heave of 55-3.8, 3½ inches. Tom Wood placed third in the shot.

Jerry Schwindenbouck took the discus with a 162'2" toss in the wind. Wood also placed third in the discus with a 162'2" toss in the wind. Moore also placed third in the discus with a 162'2" toss in the wind. Moore also placed third in the discus with a 162'2" toss in the wind. Moore also placed third in the discus with a 162'2" toss in the wind. Moore also placed third in the discus with a 162'2" toss in the wind. Moore also placed third in the discus with a 162'2" toss in the wind. Moore also placed third in the discus with a 162'2" toss in the wind. Moore also placed third in the discus with a 162'2" toss in the wind. Moore also placed third in the discus with a 162'2" toss in the wind. Moore also placed third in the discus with a 162'2" toss in the wind. Moore also placed third in the discus with a 162'2" toss in the wind. Moore also placed third in the discus with a 162'2" toss in the wind. Moore also placed third in the discus with a 162'2" toss in the wind. Moore also placed third in the discus with a 162'2"

Natalie pole vault champion Chris Haze was astounded by his inability to qualify for that event, but Paul Rosner, who transferred to Eastern this year from Seattle Pacific College, won the event with a lifetime best of 14'3". Haze apparently had timing problems in the pole vault but not in the 13'3½" high jump, where he placed first, and the high jump where he placed second. Joe Pilling placed third in the 120 yard high hurdles.

In a meet last week with Eastern's Women's Track and Field Team will host the ladies of pool and you will receive a ticket.

As the world's finest cut diamonds, the Gem Society is recognized among gem authorities, all marks set at earlier meets.

The thing that won it for us was our consistency. Our scores were not low, in fact, Berevet was tied sure of its 6-1. . . .

Results of the meet were:

 Singles

 Sue Fry (E) over Patty Price (W), 6-1, 6-0.
 Karen Gilmore (E) over Marybelles River (W), 6-4, 6-1.
 Kari Morrison (E) over Kathy Logan (W), 6-1, 6-0.
 Karen Gilmore (E) over Martina Kapulda (W), 6-1, 6-2.
 Sue Fisher (E) over Arnie Moore (W), 6-0, 6-2.

Doubles

 Hardie-Gilmore (E) over Logan-Rivera (W), 6-0, 6-2.

In a meet last week with Spokane Community College the Savagettes swept against an easy 7-4 victory, capturing all the matches -single and doubles -6-0 with the exception of one which went 6-1.

**HEY DIDDLE DIDDLE... and the ‘fish’ jumped over the moon.” Ed Fisher reaches about the half-way point of his 61’7” triple jump win.**

Eastern's unbeaten women's varsity tennis team, the two-time defending Pine League Champions, have rolled over all competition so far this season and are on the verge of a third straight league championship.

Three straight titles by the Savagettes would give them the league championship trophy for good and it would be retired to Eastern.

The Savagettes, coached by Mrs. Dana Vail who is used to both winning and champions (she coached the women's gymnastic team in an unbeatable national championship earlier in the year), have eight members.

Sue Fry, a sophomore from Spokane is presently the topseeded player on the Savagettes. In last year's championship team, she was also quite frequently the number one singles player.

Kathy Abbe, a determined freshman from Wenatchee playing only the second year of tennis competition ever, is presently the Savagettes' second-seeded player. "She's won quite often," Mrs. Vail remarked. "She also makes a very tough doubles team with Sue Fry."

Karen Gilmore, another Spokane sophomore is presently thirdseeded but has challenged Sue Fry for almost her entire position. She was also a member of last year's championship team.

In the Fourth-seeded position is Kapololu (W).

**Savages Host Golf Match**

Eastern Golfers meet Washington State, Whitworth and Gonzaga in a four way match Friday in Spokane.

In last week's match the Savages played first with Whitworth second at 397, Central third at 440 and Gonzaga scored 404 for fourth place.

Bruce Berevet was low for Eastern with a 2-under 70. Gary Lindblad had a 78. Fred Latkin, 79 and Gregg Strazz, had an 81. R. Graham Anderson, of Whitworth, was medalist with a 72.

"The thing that won it for us was our consistency," retired scores weren't low, in fact, Berevet was tied for fifth, but the other teams who scored lower also had members in the higher ranges."

Savages Win Wet Court Duel

Playing in rain and hail, Eastern's unbeaten Pine League Savagettes crushed Whitworth 5-0 Monday night in a Pine League tennis match to move a step closer to their third straight league championship.

The Savagettes won every event except the first doubles court that hampered every player and forced the Savagettes to split one singles and one doubles match.

Results of the meet were:

Singels

 Sue Fry (E) over Patty Price (W), 6-1, 6-0.
 Karen Gilmore (E) over Marybelles River (W), 6-4, 6-1.
 Kari Morrison (E) over Kathy Logan (W), 6-1, 6-0.
 Karen Gilmore (E) over Martina Kapulda (W), 6-1, 6-2.
 Sue Fisher (E) over Arnie Moore (W), 6-0, 6-2.

Doubles

 Hardie-Gilmore (E) over Logan-Rivera (W), 6-0, 6-2.

In a meet last week with Spokane Community College the Savagettes swept against an easy 7-4 victory, capturing all the matches -single and doubles -6-0 with the exception of one which went 6-1.

Eastern's ROTT rifle team successfully defended its Inland Empire Rifle Conference championship in Moscow, Idaho, Saturday, compiling 1,064 of 1,200 possible points. Idaho Navy finished second with 1,023; Gonzaga University Army placed third with 1,018; Washington State Army, 1,012; and University of Idaho Army was last with 596 points.

Kenny Hendrix won the high individual aggregate with 277 of a possible 300 points. Hendrix's 88 at 110 in the kneeling position also won him high individual kneeling honors. Ray Grimes won second high individual with a 261; Rich Cornwall won third high individual with 254 points. Les Williams contributed a 258, sixth highest aggregate.

This is the fifth year in a row that Eastern has won the championship. Sergeant First Class George Holland, Eastern Coach, and his rifle team have won 11 championships this year. It boosts the record to 110 wins and just 12 losses.

Cornwall and Grimes then proceeded to the Idaho State Gallery championships for the afternoon meet. Cornwall shot a new state record of 701 in 800 to win the 1970 state open championship of Idaho. The previous record was set by Major John Foster, currently a world class shooter from the marksmanship training unit at Fort Benning, Georgia. Grimes took sharpshooter class honors with a 755 x 800.

### Idaho Here for Tennis Match

The Savages tennis team will host University of Idaho this afternoon at 2 p.m. Eastern will be seeking revenge for a 7-2 loss to the Vandals three weeks ago.

Friday it's off to Missoula to meet the University of Montana. The Savages and the Grizzlies were rained out of a tennis match last Thursday at Cheney.

These, plus other numerous places, have been home at one time or another for Sergeant Major Edward T. Riche of Eastern's ROTC Department, in a soldier's career spanning more than 30 years.

He walks with a quiet dignity, his shoulders well set in a disciplined manner of military bearing as he moves across the campus each morning and evening going to and from Cadet Hall.

After the left pocket of his uniform, over five rows of distinctive brass buttons, and other service is the Combat Infantrymans Badge (CIB) with two stars. The badge signifies a combat veteran of one war or another. Attached to the badge signifies combat in another way, thus making SGM Riche one of a small percentage of career soldiers today who has fought in three wars.

Born in Newark, New Jersey, the 51-year-old sergeant major entered the Army in September, 1938, took basic training in Hawaii where he was required duty.

As a child, the family lived in Earl Harbor was attacked, he had returned to civilian life a few months later, and the attack he was drafted back into the Army, however, "I can sympathise with those facing induction today," he said and became an engineer non-commissioned officer with the 79th Engineer Regiment.

It was there, serving with the 2nd Infantry Regiment of the 24th Infantry Division, he earned his first star to the CIB for combat action at the Pusan Perimeter.

Following the Korean War SGM Riche served at a number of stateside posts, in Europe and another Korean tour, this one in 1963-64.

On January 15, 1965 he was promoted to sergeant major, the highest enlisted rank in the Army. In 1965 he volunteered for duty in Vietnam and soon found himself in the third war of his career.

There, with the 2nd Brigade, 1st Infantry Division he was awarded his second star to the CIB for combat action, signifying his third war as a combat infantryman in Vietnam tour with the 1st Air Cavalry Division.

Following his Vietnam tour SGM Riche was reassigned and was attached to Eastern. "I believe in this program," he said, "I believe we derive certain benefits for young individuals in college who have a military bent. There is somewhat of a civilian approach to military problems in ROTC."

After 30 years in which he has seen real combat and has been decorated with the Combat Infantry Badge (CIB) with two stars, SGM said he felt each area was unique in its own way. "Each area has something to give if a person studies the culture," he said. "There is so much to be derived from traveling around." He said he was impressed with Vietnam where there is "an intertwining of races without tension." With combat experience in three wars SGM Riche said there wasn't any basic comparisons he would make among the men who fought in them. "Wars are wars of the times, and people of the times react to the times they are in," he said. "I can't say any were any better, they all worked and lived in different environments. They each had an understanding of the responsibilities of the job they had to do and they did it, it's as simple as that.

Students Are Big Brothers

A numbers of Eastern students have been finding time to spare lately for Big Brothers for Spokane County and their general reactions sound more like proud fathers than big brothers.

Morrie Corrin, executive director of the Spokane Big Brothers, said there are faculty members and students participating. He mentioned John Senger, televi-sion major and Dave Gerlicks, speech major, who are both acting as Big Brothers.

Three Eastern students are receiving on-the-job training for work in the field of sociology working with the Big Brothers covering background and information on the youngsters enrolled in the program.

These students, Terry Doty, Susan Lehinger and John Lattimer, will work one hour a day, according to Corrin, who credited their being saving the day during our recent fund drive by keeping them off the streets.

The key to the Big Brother program is the one-to-one relationship between the Big Brother and the youngster assigned to him. Once the two are introduced, little contact is made with the organization.

Center Two-Fold Operation

Eastern's Computer Center, located snugly in the basement of the John F. Kennedy Library, is a two-fold operation -- student and faculty oriented and administration oriented.

It serves as a center of instruction and research. It is used by students, faculty and Eastern's Administration to fulfill a function for each. And, it is designed to cut back the work of weeks to days.

The student and faculty oriented division, known as the Instruction and Research (I/R) section, primarily serves as an instructional medium for students. It is also designed to offer research assistance to instructors from different departments and to aid student's with course work in all areas of study.

We currently have students and faculty from chemistry, mathematics, anthropology, political science, psychology, economics and business using the computer to work on problems, said Dave Lundean assistant director of the I/R center.

The Administrative Data Processing (ADP) section is the operating arm of Eastern's administration. It fulfills a number of functions for the school, such as making out registration packages for students.

Three times a day the new RCA Spectra 70-65 Computer is made available to the I/R operation. The new computer has a capability of operating at faster than a hundred-to-one ratio of the old IBM 1950 which had been used previously.

The computer "understands" three main languages: Fortran, Assembly Language (BAL), and Common Business Oriented Language (CBOL).

Selection of which language is to be used is dependent on the choice of computer study and which particular computer study best lends itself to the type of program that will be run as either computer operations, for example, would probably function under different computer operations.

The process of programming begins with the student writing out his program. He then puts it on a tape and feeds it into the first machine a student at the center learns to use.

After the program is completely punched out, it is checked into the input-output station with a given sequence card. The program deck then goes into one of three boxes, depending on the type of language used.

Once the boxes have enough program decks to make up what is known as a "job stream," the streams are taken into the computer room for processing. The processing either yields an output or the program gives no results.

Although the center has the capacity to save numerous man hours in study and research, Lundean said the computer operation is not stalled by students as much as it should be. "The average students here haven't had computer sophistication very long," he remarked. "They have not used it enough in their daily lives to know what to expect of a computer as a tool."

Lundean said the center was considering trying to get a computer study program going for high school teachers so that the computer science could at least be introduced to students in high school.

The feeling is that students entering college just haven't had the computer exposure to expect what we have here," he said.

SPRING TIME CALLS FOR WRANGLER JEANS

And we've got them in spring's newest and most popular colors. Select your western jeans with more zip, two front and two back pockets, in regular or cotton denim, sizes 8-20, 4.50, or the great stretch denim, sizes 8-20, 6.99.

Call or visit an FTD Florist today. And order a Big Brother Bouquet to arrive early.
New Research Machine In Chemistry Department

Eastern's Chemistry department recently acquired a new machine that will broaden the scope of undergraduate and research studies greatly.

The new addition is the Perkin-Elmer Hitachi Nuclear Magnetic Resonance Spectrophotometer (NMR). It was purchased by a National Science Foundation grant and cost of the apparatus was $38,500 not including taxes and freight.

The NMR is composed of a 2-ton electromagnet which holds the compound being observed. The compound is then spun and the electrons in the sample are lined up with or against the magnetic field of the NMR which is already established by the electromagnet.

The machine applies its field to the small electron field and transfers this information to the console unit of the NMR. Visual readings on the oscilloscope or written data on a pen unit are then studied.

On the interpretation of the data, Schultz said. "The machine integrates the area under the curves recorded and this area is proportional to the type of protons in the compound being observed."

Every molecule, when subjected to the NMR, has its own identifying peak on the recording field. The NMR presently measures only hydrocarbons such as ethyl alcohol, acetone or glycols as used in antifreeze. The NMR is also capable of measuring the fluorinated compounds using special probes.

Schults is currently working on his thesis in which he is trying to make an azarine, a compound with a particular molecular structure that has never been synthesized before. The NMR aids him in that it identifies the structure and shows impurities present in his obtained sample. Schultz said.

Let's extend this: In other Council business VanSchoor said he had attended the Board of Trustees meeting on April 17 and though the Board did not approve the Publications Board proposal submitted by Council as it was, they did "enthusiastically endorse it."

VanSchoor said there were a couple of word changes that needed to be made before the Trustees would accept it and that he and Clint Hill had met with President Emerson C. Shuck to iron them out. "I didn't feel it needed to be brought back before Council," he explained. "There were just a couple of word changes and they made no change in meaning."

The Council proposal as slightly revised is scheduled to come before the Trustees next meeting, probably sometime next month, and a final decision may be made.

LETTERS

(Continued from page 2) cheapens the significance of the original protest, both the action and the intent behind the action.

Having been associated and having worked with Olympic calibre athletes for a number of years (including some gold and silver medalists), I think one can recognize that "great athletes" can and do create very deliberate imitations which only the most dedicated athletes can really wish to champion.

Ernie M. Gare Athletic Director
U. of Notre Dame Nelson, B.C.

Two new Chevelles at two new lower prices.

Chevelle 4-Door Sedan

$148* less than our previous lowest priced 4-door.

Chevelle Sport Coupe

$147* less than our previous lowest priced hardtop.

We took America's best selling mid-size car. Then, added two new lower priced models, including a Sport Coupe that's priced less than any other mid-size hardtop can buy.

Still, they both have Chevelle's smart new grille of 1970. And Chevelle's newly styled Body by Fisher. And Chevelle's Full Coil suspension with custom fitted springs at each wheel. And Chevelle's wide-scope chassis design, side-guard beams in the doors, cargo-guard luggage compartment, bias belted ply tires.

Now it’s America’s lowest priced mid-size hardtop.

Which will get us no love notes from the competition. But maybe it will from you.

Putting you first, keeps us first.

*Based on manufacturer's suggested retail prices, excludes state and local excise and surtax. May not be new car preparation charge.
