## Excused Con Thursday, 9:20

Dr. Wendell P. Jones will speak at an excused convocation in Martin hall auditorium Thursday morning (July 5) at 9:20 a.m. His subject will be "Our Stake in Africa." Dr. Jones is lecturer for the week long study of the critical areas of Africa.

Dr. Jones, a senior member of the advisory committee of the African Studies center at the University of California at Los Angeles, was director of the UNESCO conference of representatives from 40 African nations at Addis Ababa, Ethiopia, in 1961.

He was also program director of the Peace Corps' "Teachers for Nigeria" training project at UCLA and was coordinator of two education programs in Nigeria conducted by UCLA under grants of the United States Agency for Development.

The program is open to the public.

## Tax and SU Board Send Prices Up

Prices were raised in the Student union Harbor Sunday, following action voted by the Student union board of control last week. The old prices gave way to the new after thorough debate of volume, ounces per serving and cost of handling.

When the board met Wednesday, there was little doubt that prices would be raised. The fact that the Harbor operated on a profit margin of .04 per cent without replacements and that costs were going up necessitated a change.

The unexpected element of the Harbor controversy was the application of the state sales tax law to the lunch room sales. The matter was investigated by Mr. Fred Johns, EWSC comptroller, who reported that the Harbor, open to the public, is subject to the four per cent state tax.

Students who purchased food in the union Monday seemed not to notice the price change, but they did notice the tax. Lines were slowed as customers dug deeper for the extra penny or

two usually kept in reserve for off-campus buying.

Al Elliott, presiding at the Student union board meeting last Wednesday, opened the discussion with the statement, "Our job is to protect the students' interest."

This interest is two-fold: to protect the individual's pocket book and the Associated Students' funds. Five per cent of the gross sales of the Harbor go to the ASC. If volume decreases in the Harbor, the council's share also decreases.

The Harbor management, in competing with Cheney restaurants, is compelled to operate with the equipment and facilities provided by the board, serving food at set prices. The Harbor also maintains table facilities for commuters who often bring their own lunches. For this reason the Harbor cannot compete with drive-ins.

"We try to give nutritive value and keep prices low for people trying to go through school," Mrs. Mary LaVigne, manager, stated. She welcomed some of the board's recommendations for changes, protested others. The board sets maximums and the Harbor can charge any lower price desired.

One of the big problems facing the board was that 50% of the Harbor business is coffee sales. Coffee prices could not be raised. Nor could low-volume items which would not appreciably increase the lunch room's revenue.

The final decision resulted in a few changes in breakfast prices and short order items, with five cents added to the price of pie, sodas, sundaes, and most sandwiches. The Harbor Special, formerly 65 cents without beverage, was raised to 85 cents with choice of coffee or tea. In general, the rise was five cents on the less expensive items, 10 cents on meals and pizza.

## Mr. Quinley Resigns

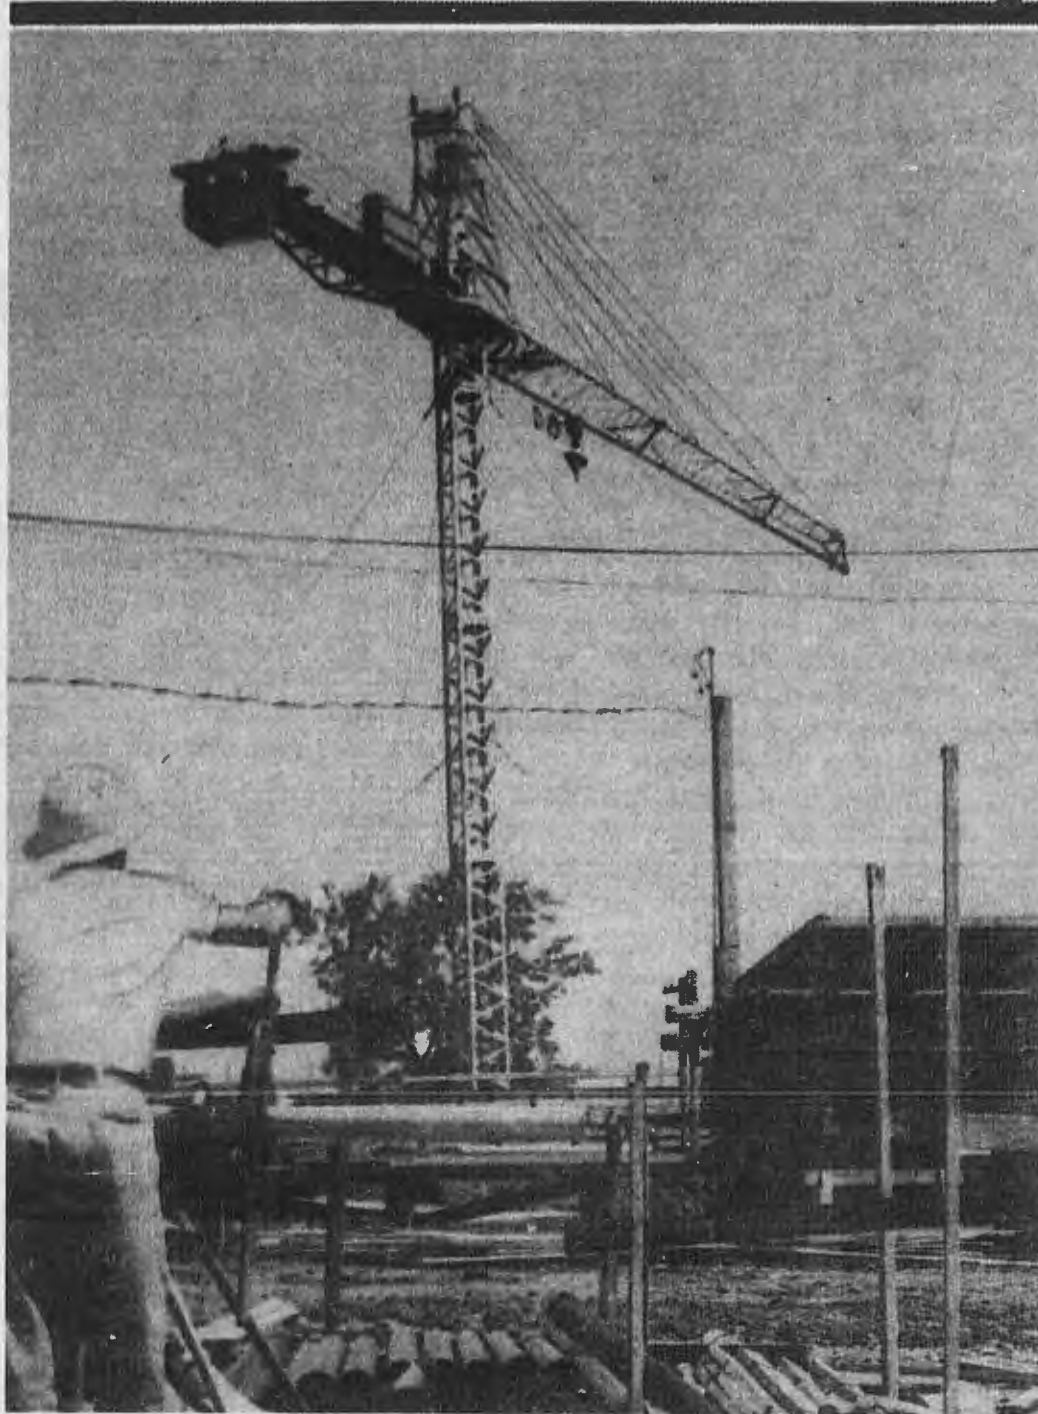

Resignation of Mr. C. W. Quinley, registrar, was announced in the EWSC Staff News Letter last week.

The report stated that Mr. Quinley will leave in August to accept a position at Stanislaus college in Turlock, Calif.

## Hell's Canyon

Early registration is requested for Saturday's recreation tour to Hell's canyon. Interested students should sign up for the trip in Dean Hagie's office, second floor, Showalter.

The boat trip from Lewiston will travel through Hell's canyon on the Snake river. Cost is \$18 per person, not including lunch. The trip will last the entire day.

Towering over Eastern's campus is this steel climbing crane which has been erected to lift sections of the men's dorm walls into place. The 65-foot crane has an 80-foot boom which is counterbalanced and may swing in a 360 degree arc. Its controls may be worn around the neck of a workman and may be operated remotely from any part of the work area. According to Wally Olson, superintendent for Halvorson, work on the dorm has been held up due to an iron workers' strike. The workman in the foreground is one of two who were working on plumbing and electrical construction last week.

## IBM Registration

### But, Machine, I Want Psych 205 at 9:40!

By Chuck Plumb

The age of automation has finally descended upon Eastern, bringing with it changes—some good, some bad.

The changes, although not due to become a reality until fall quarter, are all in the filed of registration.

C. W. Quinley Jr., registrar, said that with the advent of IBM machines a whole registration procedure will be used fall quarter 1962.

The new system which is designed to make registration and statistics easier and faster has been in operation for some time on a test basis. Quinley has been working out all the problems of registering by automation in order to "sell" the system to the administration.

The administration has obviously bought it.

That the system will actually speed up registration remains to be seen. But it will enable registry personnel to have quick access to pertinent information for whatever purpose they may have.

According to Quinley the registration procedure will be thus:

The student will pick up a registration packet from the registrar's office. The packet will be pre-punched for IBM with all the student's pertinent information. The student will then consult his counselor for his schedule of classes. Once he has decided upon his classes he is ready to register.

Fall's registration will take place in the fieldhouse. The stu-

dent will enter the practice basketball court to get basic requirements—P.E., ROTC and health. He then enters the second court to pay his fees. He cannot leave that court to sign for classes until he has paid the fees and fines imposed by the college.

The main basketball court will be reserved for signing into the respective classes. At each table the student will receive a punched IBM card for that class. He will write his name and other required information on the card and add it to his packet. He will then fill out a change in statistics card—if he has any changes—and turn in the packet. He's all through with registration.

So how has IBM helped the student?

Not much. What it has done is to cut down on the number of cards that the student must fill out during registration. This will speed up registration and cut down on the writer's cramp that all suffer after a day of filling out forms. All the student's pertinent information is already punched on the cards.

The real advantages of IBM are more evident in the registrar's office. Here personnel will be able to make minute studies concerning registration and can keep a running tally on the number who register on any certain day, hour or minute. With the IBM system

(Continued on page 2)

## Two Join EWSC Music Faculty

Two prominent musicians will join the EWSC music faculty next fall.

Dr. James J. Edmonds, piano, and Robert C. Colness, vocal teacher, will bring the total music faculty to 14 persons.

Dr. Edmonds, who visited the campus in May, will teach both private and class piano, theory, and accompanying. In addition, he will present recitals at the college.

A faculty trio composed of Dr. Edmonds, Arthur Biehl, and Wendell Exline will give a concert at the Cheney Cowles Museum in Spokane on Nov. 18.

Mr. Colness will instruct private and class voice pupils. He has been given the responsibility of developing a concert choir. Dr. George Lotzenhiser, head of the Creative Arts division, states that the enrollment of the present symphonic choir, under the direction of Dr. Ralph Manzo, has become extensive. He feels that the formation of a new choir is necessary at this time.

In private instruction, Mr. Colness will instruct alto and bass voices. Dr. Manzo will supervise the sopranos and tenors.

Colness has both bachelor of music and master of music degrees from MSU. While teaching at Custer County High school, Miles City, Montana, he produced and directed two musical comedies. He was also director of the Community chorus and play director for the Barn Summer theater in Miles City.

Dr. Edmonds appeared as soloist with the Pittsfield, Mass., symphony orchestra, and accompanied recitals in Pittsburgh and the Town Hall in New York.

While pursuing his doctorate at the University of Michigan, he presented many recitals, and was organist at the Ann Arbor Congregational church. The university had to place restrictions on his class enrollment because of his popularity.

"Both young musicians possess a dynamic personality and will be valuable assets to our music faculty," Dr. Lotzenhiser said.

## Personnel Committee

### EASTERN COMMITTEE MEETING.

The Personnel committee of the board of trustees of EWSC will meet in room 214, Showalter hall, at 9:30 a.m., Wednesday, July 11.

Members of the committee are Mrs. R. R. Morrison, Mrs. Marjorie Tanke and Mr. Joe Smith.

## Parking Fees May Rise By Fall Quarter

An increase in student and faculty parking fees was recommended last week in the Administrative council.

The recommendation calls for a \$3 per quarter student fee and five dollar per quarter fee for faculty members.

The State Legislative Appropriations committee has voted against allocating funds for state parking facilities. This means Eastern will have to provide parking lots out of school funds.

The recommendation was approved by President Patterson and may be considered by the Board of Trustees July 20.

EWSC and CWSC are the only two state schools of higher education that have not increased this fee. CWSC is expected to increase parking fees for the coming fall quarter.

With the increase in parking fees, the students will be providing for their own parking, and other building projects on campus will not be delayed.

## Give Children A Chance, Advises Miss Johnson

By Judith Huetson

"Give children a chance to use what you teach them."

This is the advice of Miss Olive Johnston, visiting instructor from Seattle, who feels that an active classroom is the one most conducive to learning.

A teacher can more effectively teach a small group of children while the other children are learning more and working harder, she said. "They are creating rather than being instructed."

Miss Johnston is instructing the three-week reading workshop for primary school which will end July 6. In her class are graduate students who are teaching now and want to know the latest methods of teaching reading.

New techniques and mechanics are being demonstrated with the help of six primary pupils who are brought in each day for part of the period. Pupils are told to pretend that they are in the first grade, at first. This method appeals to them because they want to know how to read better.

During the school year, Miss Johnston teaches in a self-contained classroom at McGilvra, a demonstration school in Seattle.

She did demonstration reading work at Washington State University for two years, and was at EWSC last year. Phonics? Yes. "We should teach sight and phonics at the same time," she said.

She has found that the child learns to read more readily in

### Registration

(Continued from page 1)

the registrar can find how many students from Podunk Junction, Washington, are majoring in basketweaving.

The main disadvantages of the system do not fall in the area of IBM, but in the area of the mechanical work of registering.

The idea that students must pay their fees before signing into classes will raise havoc with those who do not have the money on registration day. They will have to wait and probably miss the chance to sign into the classes of their choice.

Another disadvantage, one that should interest registry people, is that those who must pay special fees for music and science courses will have already paid their fees before they sign up for classes. The question is, when will they pay their extra fees?

In a lot of cases, the student does not know exactly what he is going to take when he enters the registration room—even though he has talked it over with his counselor. How can a student pay his money before he has his classes? It is like paying for something before actually receiving it.

Although it will not be in effect this fall, another change in procedure is contemplated by Quinley in the future.

This will be the dropping of instructor's names from the registration booklet. This should make no difference to new students, but upper classmen would not be able to pick their teachers.

## Creative Arts Series Enrolls 42 Students

With vigor and enthusiasm, 42 high school students invaded the Eastern campus June 17-30.

The students, including eighth grade graduates through high school graduates, were attending the annual two-week Creative Arts summer series, under the direction of Dr. George W. Lotzenhiser.

The 42 students chose six daily classes from the area in which they will possibly major: art, drama, speech, radio and television, and music. The instructors were members of the college faculty and other teachers selected on the basis of their outstanding contributions to a particular field, according to Dr. Lotzenhiser.

Many extra-curricular activities kept the students jumping including dances, movies, a treasure hunt, and a full day of picnicking and swimming at Williams lake.

The Creative Arts program was originated in 1953 by Mr. Benedict Hallgerinson who was band director at that time. The music camp was located at Luther Haven in Idaho and not directly sponsored by the college until last year.

## Charlotte Pare Receives Scholarship

Charlotte Pare, Spokane language arts major, has been awarded a \$100 scholarship for her senior year at Eastern by the Women's Relief Corps, department of Washington.

The scholarship was announced last week at the Relief Corps convention in Spokane.

## Enrollment Totals 1,504 For Quarter

The registrar's office final tabulation showed that on the last day of registration 1,504 students had signed up for the summer session.

Last year's final number of registered students totaled 1,551, but C. W. Quinley Jr., said that the 1962 total did not include those who would be signing up for the workshops and the post session.

Post session last year had 627 persons attending. This year's session will begin August 6 and continue until August 17.

About the same number of people are expected for the 1962 session.

Highlight of the session was the art show and final program Saturday, in which the students displayed their talents.

## Housemother Retires After 21 Long Years

After 21 years of service, Mrs. Mary Newton, housemother at Senior hall, is officially retiring.

But Mrs. Newton will not lose complete contact with the students of Eastern. She will be relief housemother in a program new at EWSC fall quarter. Mrs. Newton will spend one night a month in each of the women's residence halls, so that the housemothers may have one evening off.

Mrs. Newton says she will miss the girls very much, but it will be nice to have "early blinks" every night.

She plans an extended vacation, including the World's fair, and will return to Cheney, her home for many years.

Mrs. Newton's husband was the owner of the original Cheney Drug. Her two married daughters are Mrs. Marjorie Walker of Glendora, Calif. and Mrs. Marilyn Hornback of South Huntington, Long Island, New York. Mrs. Newton has five grandchildren.

## 32 Visiting Faculty For Summer Quarter

When summer session ends on August 17 at EWSC there will have been 32 visiting faculty members who have been conducting classes or workshop sessions for the past nine weeks.

Eastern has secured instructors from various parts of the country. Dr. Harold Benjamin is from Glassboro State college, Glassboro, New Jersey. Dr. James Cooper, College of Guam, Guam. Dr. Harold Durst is from Boulder, Colo., the University of Colorado. Dr. Myles Ritchie is from Florida State university, Tallahassee, Fla.

## Dr. Lotzenhiser Represents Navy

Students interested in obtaining a reserve or regular commission in the navy should contact Dr. G. W. Lotzenhiser, head of the Division of Creative Arts in the Music Building, extension 220.

Dr. Lotzenhiser is the Navy Commandant's representative on campus.

## Eastern New Tourist Meca

The initial impression would be that Eastern is becoming one of the "points of interest" for out-of-staters enroute to the Seattle World's fair.

Investigation, however, has shown that the solution is simply a humorous conspiracy between the Spokane commuters and the Cheney Street commission.

Vacationers, on the road at dawn to get an early start, traveling through Spokane on their way to Seattle join the commuter traffic to form a continuous motorcade from Spokane to Cheney.

Students, accustomed to the same monotonous route, turn off the highway, left at the detour sign, right at the next corner, weave through the streets of Cheney's huge residential district and finally reach their beloved campus.

Innocent tourists, assuming this caravan knows where it is going, simply "follow the leader," which is in evidence each morning by the numerous out-of-state cars winding erratically through Eastern's streets.

## "Snow" Opens Summer Session

Clouds of swirling "snow" heralded the beginning of summer quarter. But it wasn't cold.

The "snow" was the female fruit of the Populus deltoides, or for the sake of uninformed people, the seeds of the Northern cottonwood tree.

The area between Monroe hall and Hargreaves library was like a scene out of a winter travelogue with drifts of the cottony seeds in the streets and on the lawns. Cars traveling along "D" street would blow the seeds into huge billows resembling fine snow.

The cottonwood seed storm did no damage except to mess up a few lawns and aggravate a few allergies.

They could cause some trouble later, however, according to Dr. Frank Nicol, biology department, because they are fast growing.

Dr. Nicol said that the fall of the fruit was particularly heavy this year.

"It is probably because it all came down at the same time," he said.

Next year the cottonwood tree will not frustrate students, as it

## Industrial Arts Survey Shows Technician Need

There is a shortage of trained technicians in Washington state that is expected to more than double by 1970, a study by Dr. Robert E. Wooldridge, assistant professor of industrial arts at Eastern, shows.

The state's educational institutions are expected to increase technical training capacity three-fold, but will still fall far short of meeting the demand, Dr. Wooldridge said.

An estimated 6,873 technicians were employed in manufacturing and selected non-manufacturing industries in 1960. This number is expected to increase to 13,353 by 1970.

The increase in employment plus replacement needs because of deaths and retirements was considered to be the employment opportunities for technicians during the 1950-1970 decade, Dr. Wooldridge said. This number was expected to be 7,723 for the dec-

ade, 6,495 in manufacturing and 1,232 in the non-manufacturing industries. During the 1960-1970 decade, junior colleges and vocational-technical schools of Washington together were expected to train 5,001 technicians, 2,239 in the junior colleges and 2,762 in the vocational-technical schools, he said.

There was an estimated 2,726 employment opportunities for technicians in excess of the training opportunities. The imbalance is better illustrated by the fact that there were 1.55 expected opportunities for each technician trained, Dr. Wooldridge's study showed.

"Since the expected employment opportunities exceed the training opportunities for technicians during the 1960-70 decade, it is apparent that more vocational-technical training opportunities are needed for the people of Washington," he said.

"Since a shortage of trained technicians can hamper the industrial growth of the state, all interested groups should cooperate in developing an adequate vocational-technical education program," Dr. Wooldridge said.

## Clearance Tests, Interviews Set

All students aspiring to enter the professional education field should obtain their math clearance July 9, 2 p.m., Martin hall, room 112.

Dr. R. F. Bender, head of the economics and business department, stated last Thursday, "All those majoring in business administration or business education will be expected to have their math clearance before, or while, enrolled in business 135, 145 or 251."

An English clearance test will be given on July 10, 1:30 p.m., in the science building, room 227. Students who have not received a C or better in third quarter English are required to obtain this clearance.

There will be one more evening for Professional Education interviews, July 19.

Applications for these interviews must be in the Psychology office by July 12.

### RECREATION SCHEDULE

Thursday, 9:20 a.m. Excused convocation. Dr. Wendell P. Jones, "Our Stake In Africa." Martin hall auditorium.

Thursday, Phi Delta Kappa luncheon, noon, L.A. dining room.

Friday, 7:30 p.m. Movie, "Attila," Martin hall auditorium.

Saturday. Leave from Student Union at 4:30 a.m. for Hell's canyon excursion.

## Sfc. McCall Joins ROTC Dept.

A veteran of 20 years military service, Sfc. Robert G. McCall, has reported for duty with Eastern's ROTC department.

McCall is a native of Santa Barbara, Calif., and served six years with the Navy, including World War II service in the South Pacific, before transferring to the Army as an infantryman.

McCall's most recent assignment was with the United States military advisory assistance group to the Republic of China.

ROTC now has five enlisted men and six officers in the department.

## Faculty Leaves Granted

Sabbatical leaves for five EWSC faculty members have been approved by Eastern's Board of Trustees under a program inaugurated earlier this year.

First to take advantage of the opportunity to study or engage in academic projects are Mrs. Opal Fleckenstein and Mr. Robert Hanrahan of the art department; Miss Amsel Barton, education; Dr. George Robertson, foreign languages; and Mr. Norman Thompson, business education.

Mrs. Fleckenstein will leave during winter quarter for a research study and photography of arts and crafts of Mexico.

Miss Barton will devote winter quarter to writing children's material for supplemental reading for elementary age children.

Mr. Hanrahan's leave for fall and winter quarters will enable him to prepare a slide series on artists of the Northwest, with tape-recorded narrations and manual.

Dr. Robertson will do research fall quarter on the papers and letters of Henri Dunant, founder of the Red Cross society and first recipient of the Nobel award.

Mr. Thompson plans research on the development of instruments for understanding of high school students of the credit system in business during fall quarter.

Bill Denton, newscaster for KREM television and radio station in Spokane, has been teaching a special speech course for high school students at Eastern for the past two weeks. Denton said that he was impressed by the students' speaking ability and the interesting topics they selected.

## 59 Spring Grads Choose Education

The name has changed, but Eastern remains a college of education, if the career choices of EWSC's 124 spring graduates are examined.

An analysis of EWSC June graduates showed that 79 per cent planned careers in education, business, and health and physical education.

Dr. Robert B. Smawley, EWSC director of research, said the analysis is part of research involving almost 34,000 graduates from 135 colleges and universities.

Nationally, business was the second career choice, as it was with EWSC students. Nineteen per cent chose this field nationally; 15 per cent of the EWSC graduates planned to enter business.

On a national basis, Dr. Smawley said, engineering and humanities were tied for third in popularity, with nine per cent of the graduates choosing each field.

EWSC graduates' third choice was health and physical education, with five per cent in that group compared with a national

figure of three per cent.

Nine per cent of the graduates nationally planned careers in physical and natural science; six per cent of the EWSC graduates indicated plans to enter these fields.

Enrollment in science at Eastern is expected to show a marked increase beginning next year, Dr. Smawley said, with completion of the new \$2 million science building.

Other information obtained from the survey indicated the per cent of "positive" faculty guidance and influence. Nationally, 57 per cent of the graduates indicated such influence, at EWSC, the total was 66 per cent.

This indicates, Dr. Smawley said, that the EWSC system of individual counseling and guidance begun in the freshman year and continued through graduation, has marked influence on students.

## Visiting Professor Likes Eastern and Northwest

By Judith Huetson

"Sinful, sunny, southern California" has lent EWSC Dr. John D. Williams, visiting education professor from Long Beach State college, for the summer.

Why does he refer to his home this way? He claims that missionaries no longer need to seek converts in foreign lands. They have a field day in southern California!

Both he and his wife are native Tennesseans. Their five-year-old son, John, is attending the Campus school. He likes Cheney so much that he "wants to stay forever."

## Summer Quarter Has Three Sessions

Three summer quarter sessions are being offered at EWSC this year.

The regular seven-week Summer Quarter will be held from June 18 to August 3. A graduating high school seniors' program for entering freshmen will cover the period of June 18 through August 17.

### Post Session

The two-week post session, consisting entirely of workshop, will begin August 6 and continue through August 17.

A full schedule of classes is being offered this summer for the first time.

Approximately twenty workshops, conferences and seminars are also being offered. Highlighting these programs will be several visiting instructors of national and regional prominence.

Total enrollment for the quarter is expected to equal that of last summer. The majority of students are upper division or graduates with approximately 75 freshmen enrolled in the new three-year program.

### Indian Workshop

A two-week workshop on Indians of the United States began opening day. Four-week workshops in reading and French and a one-week program on professional organization also began on opening day.

Workshop in Education And Training Of The Mentally Retarded, which began on opening day, is one of the most desired courses. It filled immediately.

Critical areas in the cold war will be examined in a workshop started July 2. Consisting of four phases the program will continue through July 27. Many prominent authorities will conduct and speak in these classes.

Along with the Spokane County School Administrators' Association, Northeast District Superintendents' Association of Washington, the Office of the State Superintendent of Public Instruction, EWSC is sponsoring a two-day school administrators' conference starting July 12.

The annual Parent-Teacher Summer Leadership Conference was held for three days, June 27-29, with Mrs. Cecil Derr, Spokane, secretary of the Washington, Congress of Parents and Teachers, as chairman.

### PTA Workshop

A one-week Parent-Teacher Association workshop, with Mrs. Gene Pierce, Millwood, third vice-president and Eugene Elledge, principal of Cashmere Elementary School, as instructor, will begin on July 9. Kenneth K. Kennedy, EWSC director of admissions and vice president of region three, WCPT, will act as director.

William Gnaedinger, director of the audio-visual center at WSU, will conduct a three-day instructional materials workshop beginning July 18.

EWSC was recommended to Dr. Williams as having a good reputation and he wanted an experience in the Northwest. He and his family are "having a ball." Since arriving June 15 via the World's fair, they have toured the surrounding area extensively.

Dr. Williams enjoys the leisurely atmosphere of our campus, and is getting acquainted with the students and faculty. Our students seem to have more time, he said, and he considers this conducive to learning. "They are also conscientious."

He earned his B.A., M.A., and Ph. D. at the University of Tennessee, and taught both elementary and high school in that state. He then became principal of the lab schools at New York State University in Fredonia, and the University of Wyoming in Laramie.

His activities as a visiting professor have taken him to the University of Tennessee and the University of Kentucky. He will return to his position at Long Beach State college after the EWSC summer session.

Because Dr. Williams likes all types of outdoor life, mainly camping and fishing, his doctoral dissertation was on outdoor education. His topic includes that which can be most effectively taught outside of the school building: science, conservation, and group living at the elementary school age. He notes that, "this is one of the most potent recent developments in modern education."

Because of his interest in nature, Dr. Williams is fascinated by the numerous gardens in Cheney. "It seems that wherever a spare bit of ground exists, we find a garden."

Dr. Williams has a wide range of professional activities. On July 1, he became president of the Southern Section, California Association for Outdoor Education. He is on the executive board of the California Association for Childhood Education. Next year he will be on the advisory board selecting topics and authors for the California Journal of Elementary Education.

Combined with a relaxed, interesting method of instruction, Dr. Williams has a positive philosophy of teaching. He feels, he said, that educators are doing a good job, but we must ask ourselves: "How can we do better? Where do we go from here?"

He asserts that we must integrate and correlate all subjects.

## LITTLE MAN ON CAMPUS

"ONE OF TH' FINEST FRESHMAN LITERATURE TEACHERS WE'VE EVER HAD."
